
docster Documentation

Release 0.0.1

Sonal Raj

Oct 30, 2018

Contents:

1	Installation	3
2	Indices and tables	5

Contents

- *The Docster Project*
 - *Installation*
 - *Indices and tables*

A versatile library to play around with reports and data formats. Generate beautiful and professional reports from manual and automated processes and export them - send them as an email, dump as a web page, store pdf reports for client usage and many more. Docster is fully customizable and comes with several themes out of the box. Support for jinja templates will be added soon.

CHAPTER 1

Installation

You can build the source by cloning the github repo or directly pip it.

“ pip install docster “

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
